Glee Earl Rupal

Product Designer (UI/UX)

glee.rupal@gmail.com Cebu City, Philippines linkedin.com/in/gleearl design.gleearl.com

Product Designer with 9 years across UI/UX design and frontend development. I combine user research, interaction design and a working knowledge of code to simplify complex workflows, with experience designing healthcare platforms, business applications and shared design systems.

Experience

UI/UX Designer @ MIMS Pte Ltd

February 2024 - Present

- Design web and mobile experiences for medical education and drug reference platforms used by healthcare professionals across Asia.
- Used GA4 to find that webinar and course sign-ups rarely led to return visits, then designed the app's notification system: push, an in-app center and one clear action per message. Engagement rose after launch.
- Ran user interviews and concept tests with medical professionals for the news and disease site. Every recommendation shipped, including a visible specialty filter.
- Built the web app's Figma design system from the live site, using Claude Code and Figma MCP to pull styles: semantic tokens, stateful components, 22 page templates.

UI/UX Designer @ Humedit

July 2022 - December 2023

- Owned the design of three apps (accounting, HR and payroll, point of sale) on one shared system, from wireframes to high-fidelity prototypes.
- Made easyFS much easier to use by simplifying its key flows and reorganizing navigation around plain, familiar labels.
- Shipped production frontend features in Angular and Vue, true to the design.

Full Stack Designer @ Hurdman, Inc

December 2018 - May 2022

- Designed and coded client products: a staff records system and profile form for the Better Business Bureau (BBB), a business directory and a website monitoring SaaS.
- Created a UI style guide with matching Sass styles, so every screen was built the same way.

Jr. Web Designer @ Mopro

April 2017 - October 2018

- Designed and built responsive landing pages and microsites for enterprise clients.

Skills

Design

User research, usability testing, user journeys, information architecture, interaction design, prototyping, design systems, accessibility

Tools

Figma, FigJam, GA4, Jira, Notion, Claude, ChatGPT, Figma MCP

Frontend

HTML, CSS / Sass, JavaScript, TypeScript, React, Angular, Vue

Education

BS Information Technology

Cebu Institute of Technology - University
Cebu City, Philippines
2013 - 2017

Certifications

Interaction Design Foundation

Usability Testing, Design for Thought and Emotion, UX Beginner's Guide
2025

Google UX Design Foundations

2023

Interests

Hiking, camping, backpacking, travelling
